DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-3,6,7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsugita et al. (5,911,734) in view of Pinchuk et al. (6,254,633). Tsugita discloses as shown in figures 15 and 15A a filter system comprising a wire 207 having a proximal end and a distal end, a filter for collecting debris from a body lumen having supporting frame 203, an outer shaft 202, an inner shaft 201, and a coil spring 206 adapted to cause radial expansion of the filter. Tsugita is lacking for not having a dilator tip. However, Pinchuk discloses a dilator tip 30 slidably disposed in the distal sheath 22 by having a guide wire passage 32 for receiving a guide wire 26.

Regarding claims 1 and 17, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to modify Tsugita by including a dilator tip slidably disposed in the distal sheath in view of Pinchuk to aid navigation of delivery device through a body lumen.

Regarding claim 2, note figures 5-8 of Pinchuk.

Regarding claim 3, Tsugita teaches the coil spring disposed in the sheath when the sheath 202 is in position as shown in figure 15.

Regarding claim 6, Tsugita teaches the inner shaft 201 disposed about the wire 207.

Regarding claim 7, Tsugita teaches the length of the inner shaft 201 being substantially shorter than the length of the outer shaft 202. Note figure 15.

Allowable Subject Matter

2. Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to the Applicant's Remarks

The applicant arguments filed on 4/12/05 have been fully considered but they are not persuasive. The examiner disagrees with the applicant arguments stating that neither Tsugita et al. nor Pinchuk et al. disclose a coil spring adapted to bias any portion of the filter assembly in a distally advanced position because the coil spring 206 of the Tsugita et al. reference is adapted to bias the tip 204 as a result of the contraction or elongation of the coil spring 206.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/083,810

Art Unit: 3731

shortened statutory period will expire on the date the advisory action is mailed, and any

Page 4

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Charles H. Sam whose telephone number is (571) 272-

4703. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anhtuan T. Nguyen can be reached on (571) 272-4963. The fax phone

number for the organization where this application or proceeding is assigned is 703-

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
